

# 3 CONSIDERATIONS WHEN RENTING A RAMP

## THE RIGHT WAY

[www.YardRampGuy.com](http://www.YardRampGuy.com)

### 1 RAMP SPECIFICATIONS

Most of our rental ramps are rated for 20K-lb. capacity, 84" width and 35' or 36' length. These specs are ideal for about 90% of the rental market for ground-to-truck and ground-to-dock applications.

And for the other 10%? We're committed to finding the right solution for your business needs.

### 2 AVAILABILITY

Our rental ramp listings show expected availability dates. Be sure to ask about updates or changes because . . .

- Some renters choose to extend their rental period.
- Some renters finish early.
- Some rental ramps have not yet been posted.

### 3 LOCATION

Most of our rental ramps sit within 250 miles of 90% of the population!

The Yard Ramp Guy seeks geographically desirable ramps for our renters, reducing the cost of freight for you. The return freight charge is often lower because it's based on shipping back to our nearest depot.

## STRATEGY

The Yard Ramp Guy has depots strategically located throughout the United States.

Current Yard Ramp Guy depot locations:

CT, NJ, PA, VA, NC, GA, FL, OH, TN, MS, IL, MO, TX, CO, CA

## WHAT'S THE DIFFERENCE?

We offer the largest inventory of used yard ramps in the nation. We are the only company in America that offers rental ramps throughout the country. Every. Day.

Thank you for the opportunity to earn your business.
