

# BUYER BEWARE!

**WARNING:** When you see yard ramp pricing that seems **Too Good To Be True**, we urge you to proceed with extreme caution. Those ramps will most likely fail you and cost you more in the long run. Here's why:

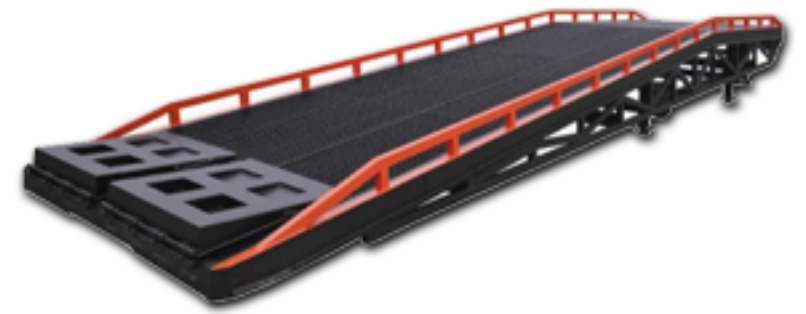

## DESIGN

These ramps are designed to maximize manufacturer and dealer profits, while using cheap design features and sacrificing safety.

## MATERIALS

They utilize inferior foreign steel product or lowest grade U.S.-sourced raw material.

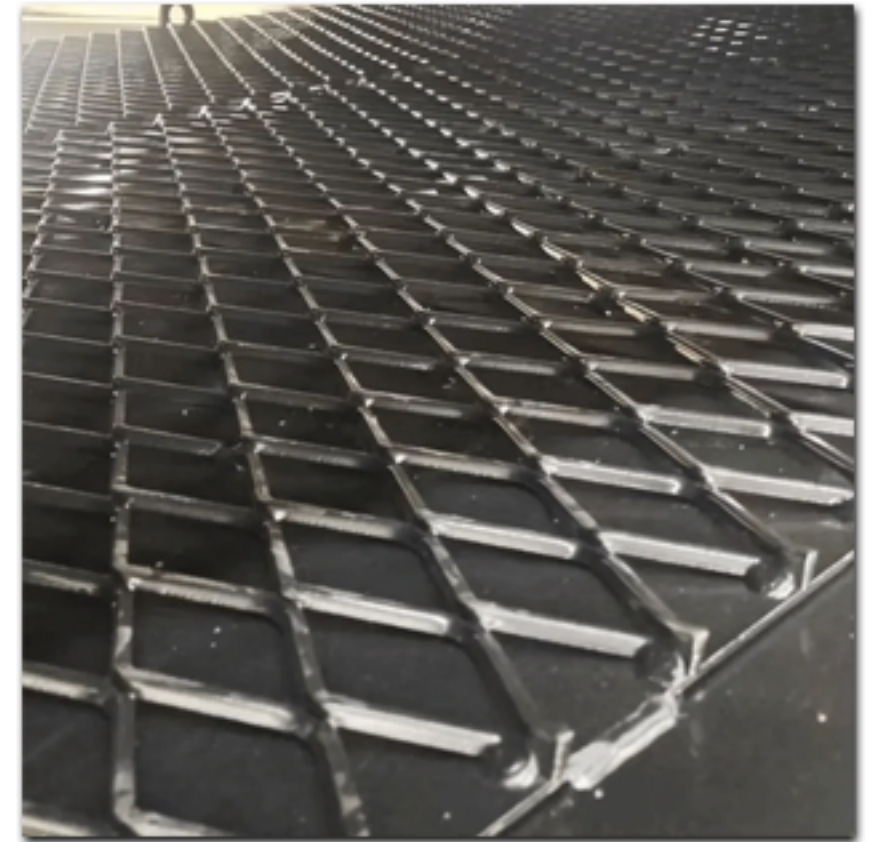

## LABOR

"U.S." versions are not constructed by industry-certified workers or welders.

## THE RESULTS

Buyer suffers high cost of repairs, lack of efficiency, loss of use, cost of workers' comp claims, loss of employee due to injury or death.

# IMPORTANT!

There are only two reasons to own a yard ramp:

1. Greater Efficiency
2. Greater Safety

If you can't have both, you shouldn't have a ramp.  
Contact us for an honest discussion about your needs.  
We look forward to earning your business.
