

# Instructions: Ramp Condition Verification for Medlin Stationary Ramps

**The photos shown below are the minimum REQUIRED.**

## Submit your photos by one of these:

- Text Message to Jeff Mann at 847-770-1360 (Cell)
- Email to [Photos@YardRampGuy.com](mailto:Photos@YardRampGuy.com)

Start text or e-mail subject line: **"Photos from [Your Name] of [Company]"**

**Print this page. Submit photos similar to examples below!**

### ATTN: SELLER

Sellers must provide Ramp Condition Verification Photos prior to ramp being posted or quoted for sale. See "Full Disclosure" below.

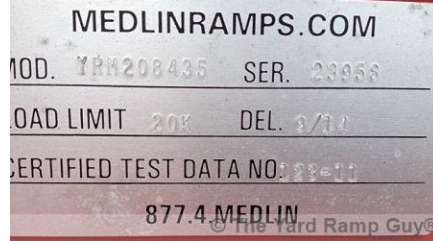

### Why are photos required?

- 1. Promotion** – Sellers want to showcase their ramp in its most positive light. The more photos illustrating the condition of your ramp, the better chance we have of selling it at or near the asking price.
- 2. Shorter Sales Cycle** – Sellers want their ramp to sell as quickly as possible. Our experience tells us the more photos illustrating the condition of a ramp, the shorter our sales cycle is for that ramp.
- 3. Full Disclosure** – We must provide our customers with full disclosure of the good, bad and ugly for any ramp we sell or rent. This assures our customers can make informed decisions and protects all parties in the transaction.

### Photo Tips:

- 1. Phone Camera** – We encourage you to use your phone for photos. This is quick, easy and typically delivers quality photos.
- 2. Debris** – Please clear ramp deck and area around ramp of debris which detracts from viewing the ramp in a positive light.
- 3. Quality** – The examples shown are all from customers or vendors like you. We appreciate and accept your best effort.
- 4. \*-Missing Items** – If you do not send a photo of a ramp clamp, tow bar, pump handle, or safety chains, we will assume the item is lost or was never part of your ramp.

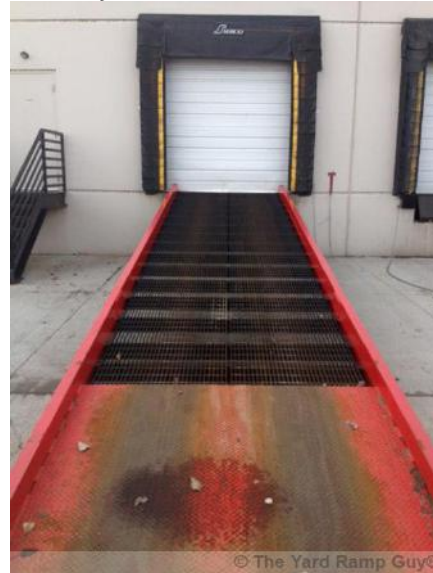

Factory ID: (found on side rail)

Stationary Side Angle:

Stationary Full Deck:

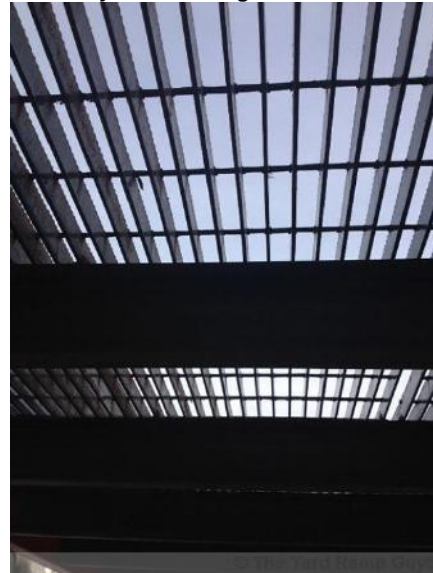

Stationary Install w/Chain Brackets\*:

Stationary Install w/Spot Weld\*:

Stationary Undercarriage:

Stationary Support Leg\*:

### Reporting Damage or Repairs:

If there is damage to the ramp, or visible prior ramp repairs, be sure to send photo(s) showing the damage or repair. This is particularly important with regards to a side rail, deck, undercarriage, wheels, or mobility system.
